Great service and great price. They even explain well regarding on how to take care of my tyre and absorber. I did alignment for only RM25 and balancing for RM5/tyre. (Perodua Axia) total only 45. Other place RM45 you can only do alignment and RM7-8/tyre for balancing which would've cost around RM70+ total. Unbelievably cheap yet great service here. Very recommended. But better call first before walk-in so they can let you know whether it's full or not.
